

City of Slayton, Minnesota  
2424 26<sup>th</sup> Street  
Slayton, MN 56172

**From:** City of Slayton  
**Date:** October 21, 2024  
**Subject:** Completion and Submission of Service Line Materials Inventory

The City of Slayton has successfully completed and submitted our service line materials inventory to the Minnesota Department of Health.

The service line inventory is now publicly available. You can check the materials for your service line by visiting the Lead Inventory Tracking Tool (LITT) at <https://maps.umn.edu/LSL/>. Additionally, you may contact us at (507) 836-8534 for further information.

To complete the service line inventory, our system collaborated with DGR Engineering to review records of the city's water system, historical city water maps, and records of city improvement projects completed over the past 40 years. Additionally, a public outreach campaign was completed, asking property owners to submit information and/or photos of service lines within their properties.

As of August 29, 2024, our inventory contains:

- 0 lead service lines
- 9 galvanized service lines requiring replacement
- 606 unknown material service lines
- 462 non-lead service lines

We appreciate your attention to this matter and encourage you to check your service line materials using the provided resources. Should you have any questions or require further assistance, please do not hesitate to contact us.

Sincerely,

Josh Malchow  
City Clerk/Administrator
